

Loop — close the feedback gap

Turn scattered customer feedback into a ranked, shippable backlog — automatically.

The problem

Product teams drown in feedback across email, Slack, tickets and calls. It takes ~6 hours a week to collect, and the signal gets lost — so roadmaps get built on the loudest voice, not the strongest evidence.

The solution

Loop ingests every feedback channel, clusters it by theme, and ranks themes by reach × revenue × strategic fit — a live, evidence-backed backlog your whole team trusts. No more manual triage.

Why now

Signal	Detail
Market	Feedback tools are point solutions; none rank by business impact
Traction	40 teams in beta · 92% weekly retention · \$9k MRR
Wedge	The only tool that ties feedback to revenue, not just volume

The ask

Raising a \$1.5M pre-seed to reach \$30k MRR and 200 teams in 12 months. **Let's talk** → jordan@loop.so
